Professional Profile

Software Engineer with professional experience in backend, web, and mobile application development using Python, Django, React, and React Native. Experienced in building REST APIs, data models, authentication workflows, and user-facing features, as well as integrating external services and supporting application testing and releases. Interested in building reliable software and strengthening expertise in backend engineering, cloud technologies, and AI/LLM integration.

Technical Skills

Programming Languages: Python, JavaScript, SQL
Frameworks & Libraries: Django, React, React Native
Databases: PostgreSQL, MySQL **Development & Delivery:** Git, GitHub, Docker, Nginx, Expo EAS
APIs & Authentication: REST APIs, Google Sign-In, access/refresh-token workflows

Professional Experience

Ubymed S.A. **Feb 2025 – Present**
Full-Stack Developer | Part-time Freelance *Guatemala City, Guatemala | Remote*

- Developed and maintained two React Native apps for clients and healthcare providers, owning UI/UX, API integration, testing, initial app-store launches, and subsequent Android/iOS feature releases with Expo EAS.
- Developed Django API endpoints, data models, and business logic across two existing, independently deployed backends for authentication and healthcare operations.
- Refactored medical-service ordering and state transitions; implemented device-token registration and Expo push notifications triggered by order and provider actions.
- Built role-specific doctor/phlebotomist workflows, client/provider order histories, and clinical-history entry and retrieval for follow-up visits.
- Integrated Google Maps for place search, directions, and saved locations; built family-member/contact profiles and location selection for service requests.
- Refactored access/refresh-token workflows between mobile apps and backend services, resolving token storage and persistence issues on physical devices.
- Updated Django application code on an existing server and restarted Docker containers to release backend changes.
- Coordinated four additional developers for two months, delegating modules, reviewing pull requests, and improving development environments and Git workflows.

Suministros & Alimentos S.A. **Jun 2024 – Jul 2024**
Full-Stack Developer | University Internship *Guatemala City, Guatemala | On-site*

- Independently developed a Django, React, and PostgreSQL MVP to centralize factory production data, designed to replace paper-based supervisor reporting and improve record consistency.
- Built supervisor data-entry forms with calculated fields and company-domain-restricted Google Sign-In; handed over the code and repository for potential internal use.

Tribal Worldwide **May 2023 – Jul 2023**
IT Analyst / DevOps | University Internship *Guatemala City, Guatemala | On-site*

- Provided internal IT support and renewed website TLS certificates using Let's Encrypt.
- Assisted senior DevOps and vendor engineers with a server migration to Huawei infrastructure, joining technical meetings and migration tasks.

WAU **Jun 2022 – Jul 2022**
Full-Stack Developer | University Internship *Guatemala City, Guatemala | Remote*

- Contributed early-stage CRM CRUD functionality and documentation using JavaScript, MySQL, Bootstrap, and jQuery.

Education

B.S. in Systems Engineering and Computer Science *Jan 2021 – Dec 2025*
Universidad del Istmo | **Magna Cum Laude** | GPA: 3.49/4.00
Leadership Diploma | Universidad del Istmo 2023

Certifications & Training

Registered Scrum Basics – Scrum Inc. Aug 2025
CS106A: Code in Place – Stanford University Jun 2025
Project Management Fundamentals – IBM Mar 2025
GitHub Foundations – GitHub Jul 2024 | Credly badge expires Jul 2027
IBM PY0101EN: Python 101 for Data Science – IBM Aug 2023
Java Certification – Intecap Dec 2021

Languages

Spanish (Native) | English (B2 – ELASH Certified)
